

SAVARTUS
MANAGE. STORE. PRESERVE.

OPTICAL STORAGE SYSTEMS

ELS150

Multi-Tier Storage & Preservation

Performance today.
Preservation tomorrow.

ELS150 keeps everyday organizational storage responsive with a disk cache server built into the 14U appliance. Each write is automatically burned to a second, write-once Blu-ray copy for durable, long-term preservation.

AVAILABLE.
AUTHENTIC.
DEFENSIBLE.
FOR WHAT'S
NEXT.

SSD / HDD Performance Tier

High-speed access
for active and frequently
accessed data.

Optical Preservation Tier

Write-once optical storage
for durable, tamper-resistant
preservation. Data remains
online and accessible.

Offline Optical Deep Preservation

Removable media for
air-gapped, long-term
retention and
additional protection.

30 TB

Maximum storage
(with current 200GB discs)

150

Optical media
slots

Up to 4

Blu-ray drives

80 MB/s

Concurrent
optical throughput

Why It Matters

- ✓ Keeps critical data available, authentic, and defensible for the long term.
- ✓ Reduces dependence on recurring disk-array refresh cycles.
- ✓ Ideal for regulated, high-value, and long-retention workloads.

Best-Fit Workloads

Government records and
official document retention

Medical images and
regulated evidence archives

Remote-sensing and scientific
data repositories

Enterprise backup, disaster recovery,
and compliance retention

DATA ENDURES.
WE HELP YOU PRESERVE WHAT MATTERS.

System Architecture

A UNIFIED PLATFORM FOR TODAY AND TOMORROW.

INTEGRATED CACHE SERVER

Built into the ELS150 for everyday reads and writes. The cache server provides responsive file access while each write is automatically copied to write-once Blu-ray media.

Optical Preservation Tier

Write-once optical storage for durable, tamper-resistant preservation. Data remains online and accessible through the system.

Offline Optical Deep Preservation

Removable media for air-gapped, long-term retention and additional protection.

Specifications

Optical disc configuration	3 standard disc magazines; up to 150 discs (Type III magazine)
Disc capacity (current)	Up to 200GB per disc; 30TB maximum system capacity (with current 200GB discs) <i>Support for 500GB discs planned (future)</i>
Optical drives	Up to 4 Blu-ray drives; 80MB/s concurrent throughput
Disk configuration	4 x 3.5 in drive bays; supports SSD and/or HDD; independent single-disk mounting; XFS file system
Redundancy	Optical RAID 11+1; automatic rebuild from Blu-ray on disk failure
External interfaces	Gigabit LAN; SAS expansion support; standard S3 protocol
Power consumption	550W maximum; reduced with intelligent disk sleep
Dimensions & weight	331 x 592 x 642 mm (14U); up to 55 kg
Reliability	Electronics MTBF >100,000 hours; robotic arm >2,000,000 cycles

Data Protection

- ✓ Disk tier supports everyday high-speed access.
- ✓ Original copy is written to Blu-ray for tamper-resistant retention.
- ✓ Parity protection: one parity disc per 12 discs.
- ✓ Automatic rebuild from optical media on disk failure.

Services & Support

- ✓ On-site installation and commissioning service.
- ✓ 3-year full-system warranty on core hardware.
- ✓ 7x24 technical support.
- ✓ Custom integration support.

STORAGE TODAY. PRESERVATION TOMORROW.
