

ELS300

Rack-Mount Optical Storage System

High-capacity preservation for what matters most.

The ELS300 is an all-in-one organizational storage appliance with its cache server integrated in the same 7U chassis. Everyday access runs through the built-in cache, while each write is automatically burned to a second, write-once Blu-ray copy.

7U Rack-Mount Form Factor
448 x 310 x 930 mm | 80 kg

57.6 TB

Maximum system capacity
200 GB double-sided media

288

Optical media slots

Up to 4

Blu-ray drives

80 MB/s

Concurrent
optical throughput

High-Capacity Optical Storage

Up to 288 Blu-ray discs
in a rack-mountable 7U
design.

Write-Once for Lasting Protection

Blu-ray media with optical
RAID 11+1 for long-term,
tamper-resistant preservation.

Standards-Based Integration

Standard S3 interface for
application-friendly
integration with your
environment.

Why It Matters

Keeps critical data available, authentic,
and defensible for the long term.

Reduces dependence on recurring
disk-array refresh cycles.

Ideal for regulated, high-value,
and long-retention workloads.

Best-Fit Workloads

Government records and official document retention

Medical images and regulated evidence archives

Remote-sensing and scientific data repositories

Enterprise backup, disaster recovery,
and compliance retention

STORAGE TODAY.
PRESERVATION TOMORROW.

System Architecture

HIGH-CAPACITY. LONG-TERM. DEPENDABLE.

Rack-Mount Optical Storage System

ELS300 is an all-in-one organizational appliance with its cache server integrated in the 7U chassis. Every write automatically creates a second, write-once optical copy.

Specifications

Form factor	7U rack-mountable (19-inch rack)
Optical disc configuration	24 standard disc cassettes; up to 288 discs (Type III magazine)
Disc capacity	Up to 200 GB per double-sided disc; 57.6 TB maximum system capacity with 288 discs.
Optical drives	Up to 4 Blu-ray drives; 80MB/s concurrent throughput
Disk configuration	4 x 3.5 in drive bays; integrated cache server; XFS file system.
Redundancy	Optical RAID 11+1; automatic rebuild from Blu-ray on disk failure
External interfaces	Gigabit LAN; SAS expansion support; standard S3 protocol
Power consumption	550W maximum; reduced with intelligent drive sleep
Dimensions (H x W x D)	448 x 310 x 930 mm (7U); supports standard 19-inch rack
Weight	80 kg
Reliability	Electronics MTBF >100,000 hours; robotic arm >2,000,000 cycles

Data Protection

- ✓ Original copy is written to Blu-ray for tamper-resistant retention.
- ✓ Optical RAID 11+1 with automatic rebuild on drive failure.
- ✓ Designed for long-term data integrity and availability.
- ✓ Integrates with your existing backup and compliance workflows.

Services & Support

- ✓ On-site installation and commissioning service.
- ✓ 3-year full-system warranty on core hardware.
- ✓ 7x24 technical support.
- ✓ Custom integration support.
